

ARCHANGEL METATRON

THE ANGEL OF LIFE

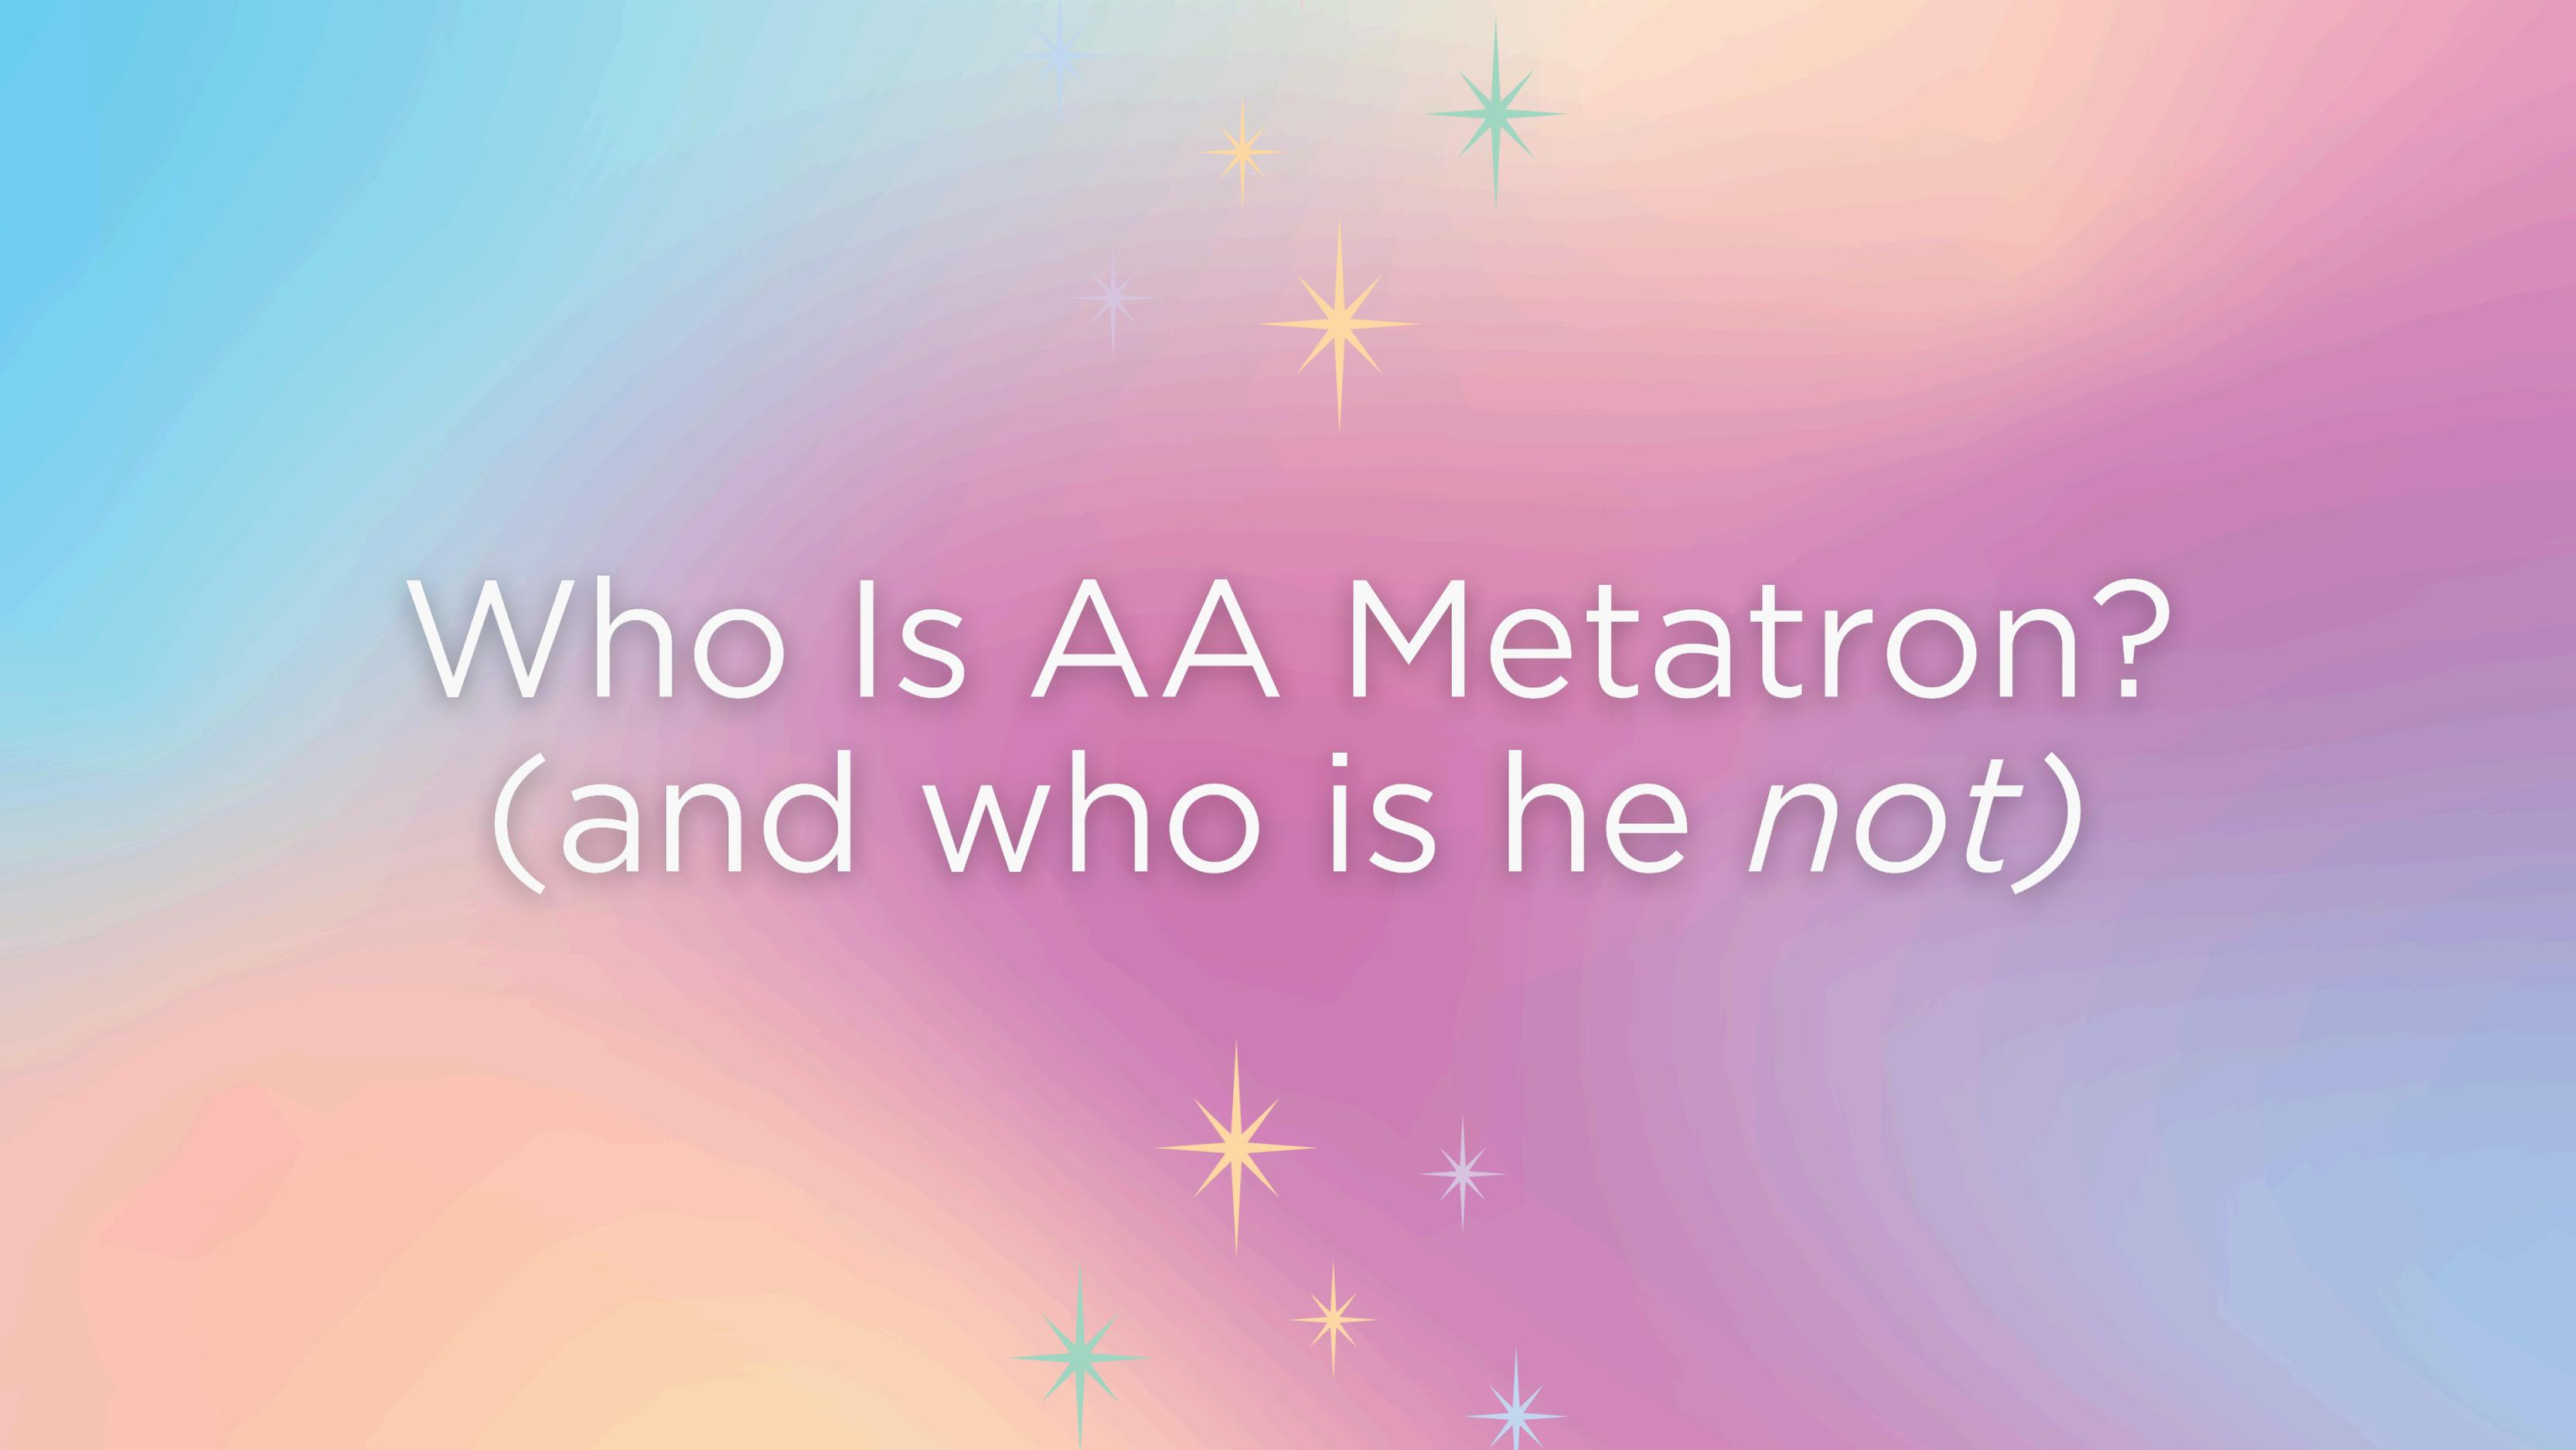

Intro

With intense, bold energy there is no mistaking

Archangel Metatron's presence! If you are clairsentient and have ever worked with him, I'm sure you know what I'm talking about!

Archangel Metatron is a wonderful resource to work with for several reasons that I will cover in this mini-course.

Who Is AA Metatron? (and who is he *not*)

Who He Is

- + He is known as the “Angel of Life”. In Jewish mystical traditions (Kabbalah) he is the keeper of the tree of life. It is his job to ensure the stream of life energy remains balanced and flowing.
- + He is the keeper of the Akashic records. He knows every possible timeline that has ever or will ever exist.
- + He is believed in some traditions to be the “top angel”, the one closest to God.

Who He Is Not

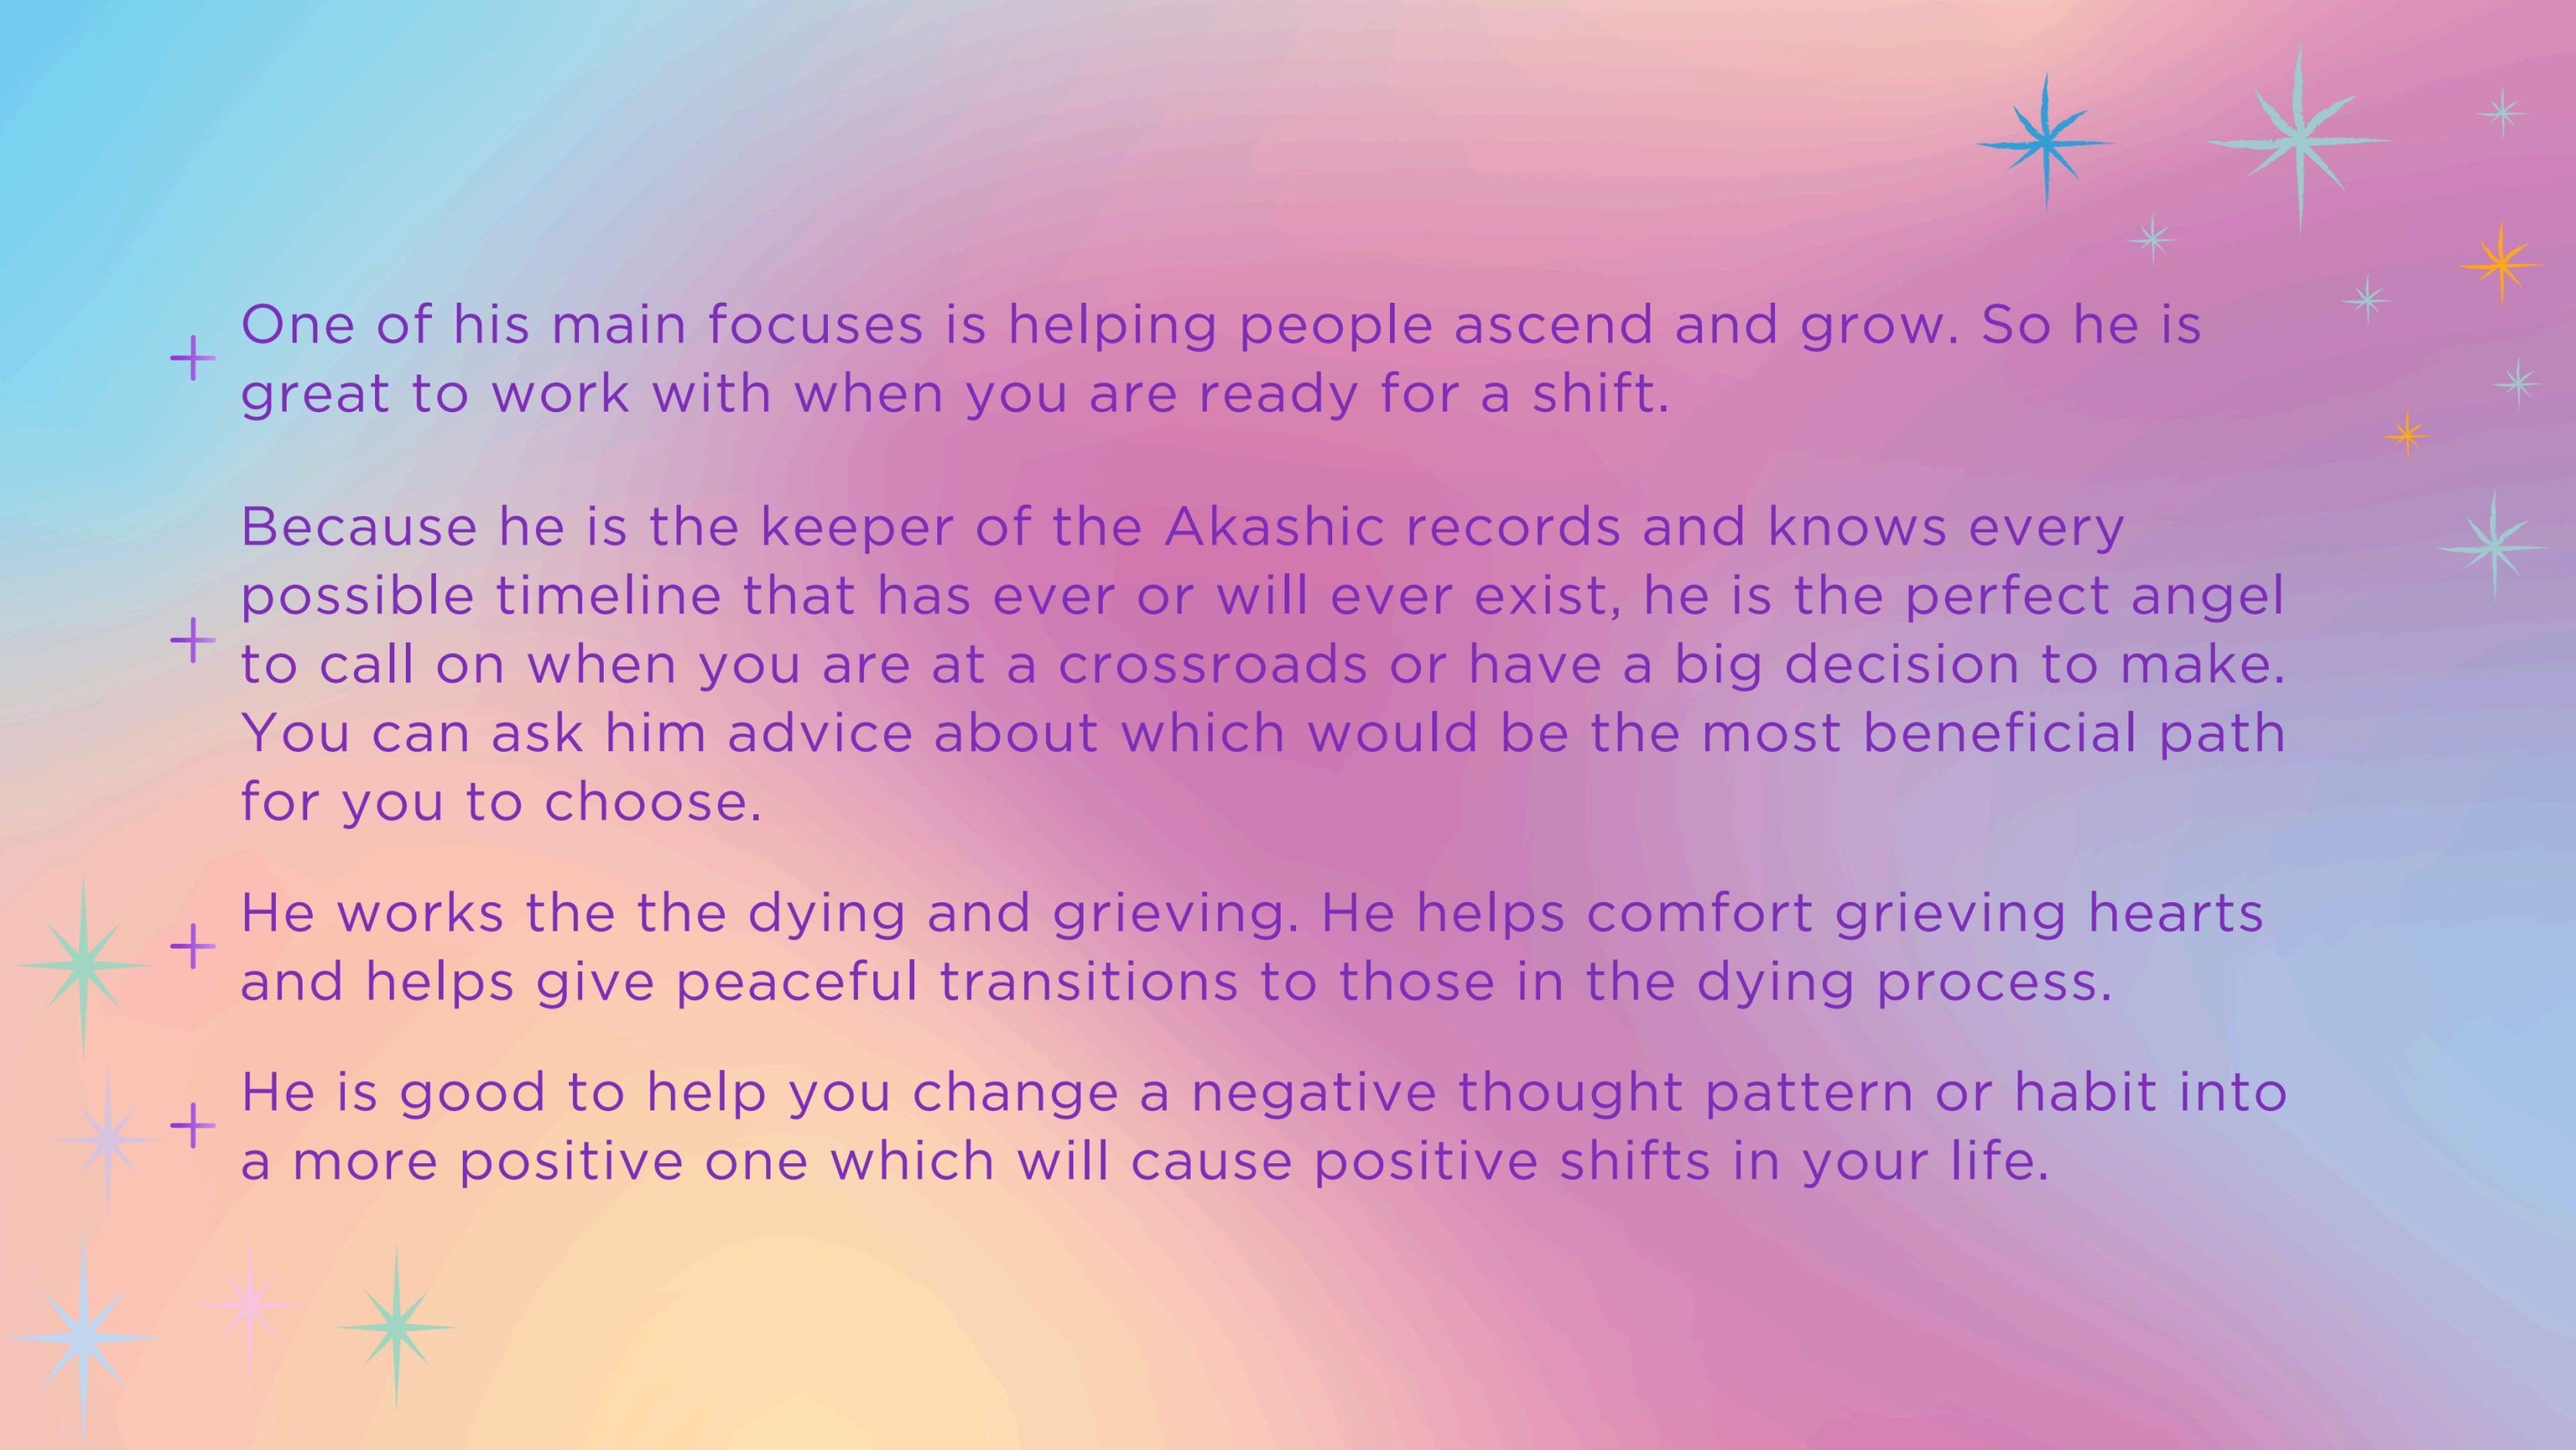

- + He is incorrectly labeled by some as being Enoch from the Christian Bible.
- + He is incorrectly labeled by some as a demon who has malevolent intentions.

He is *neither* of these things.

These tend to stem from fear-based ideologies.

When to Work With or Call on Him

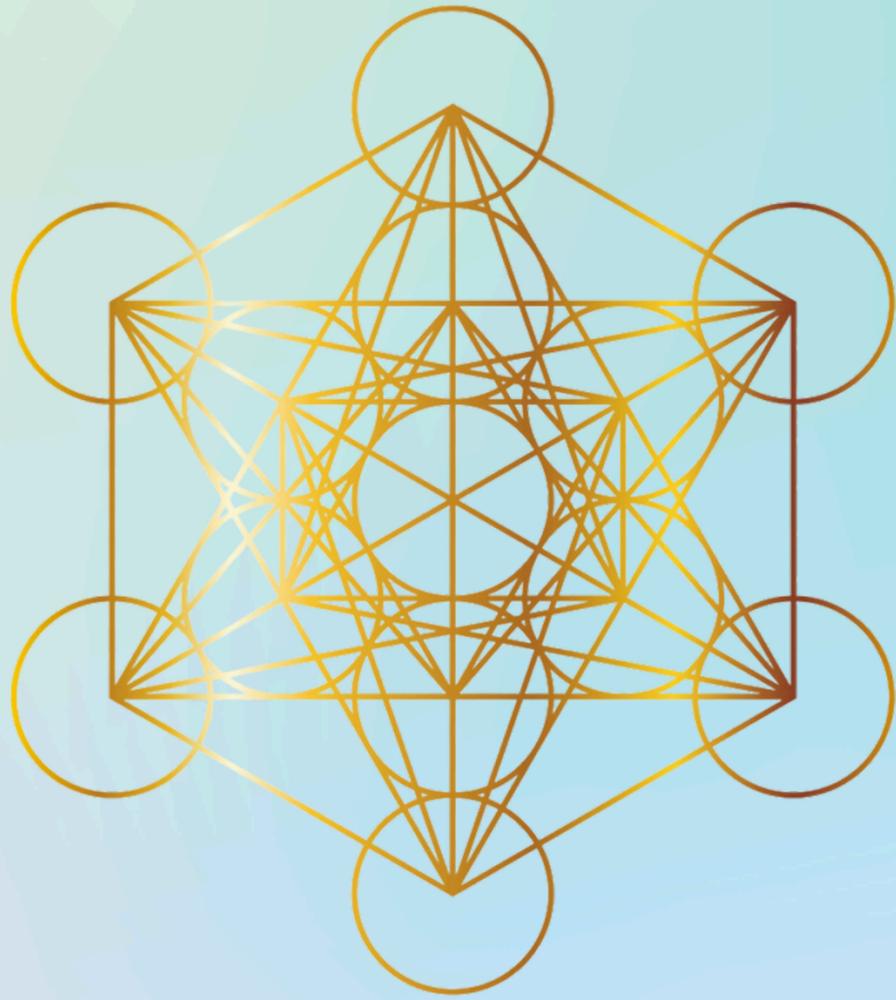

+ One of his main focuses is helping people ascend and grow. So he is great to work with when you are ready for a shift.

+ Because he is the keeper of the Akashic records and knows every possible timeline that has ever or will ever exist, he is the perfect angel to call on when you are at a crossroads or have a big decision to make. You can ask him advice about which would be the most beneficial path for you to choose.

+ He works the the dying and grieving. He helps comfort grieving hearts and helps give peaceful transitions to those in the dying process.

+ He is good to help you change a negative thought pattern or habit into a more positive one which will cause positive shifts in your life.

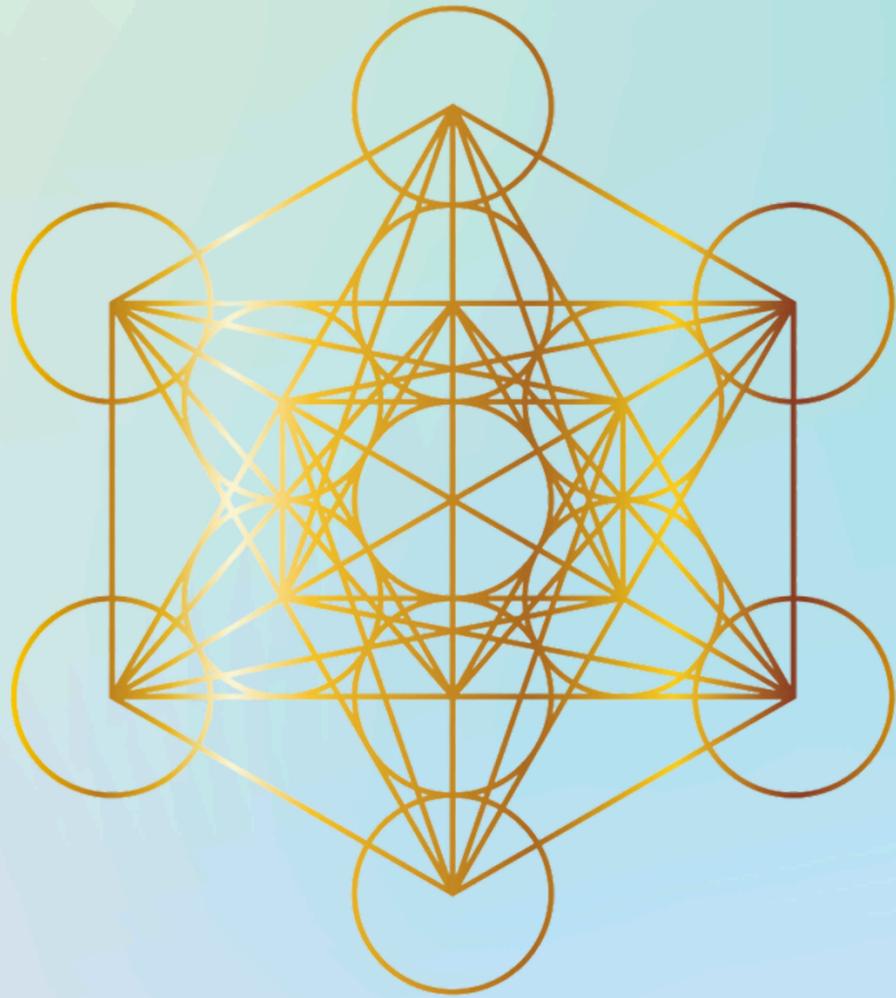

Metatron's Cube

Metatron's Cube is the piece of sacred geometry associated with Archangel Metatron. It is a symbol associated with universal creation.

It is actually a 3-D shape known as a Merkaba and is said to hold all shapes known in the universe. When in 2-D, it is drawn with 13 circles connected with lines. The circles represent the feminine and the lines represent the masculine.

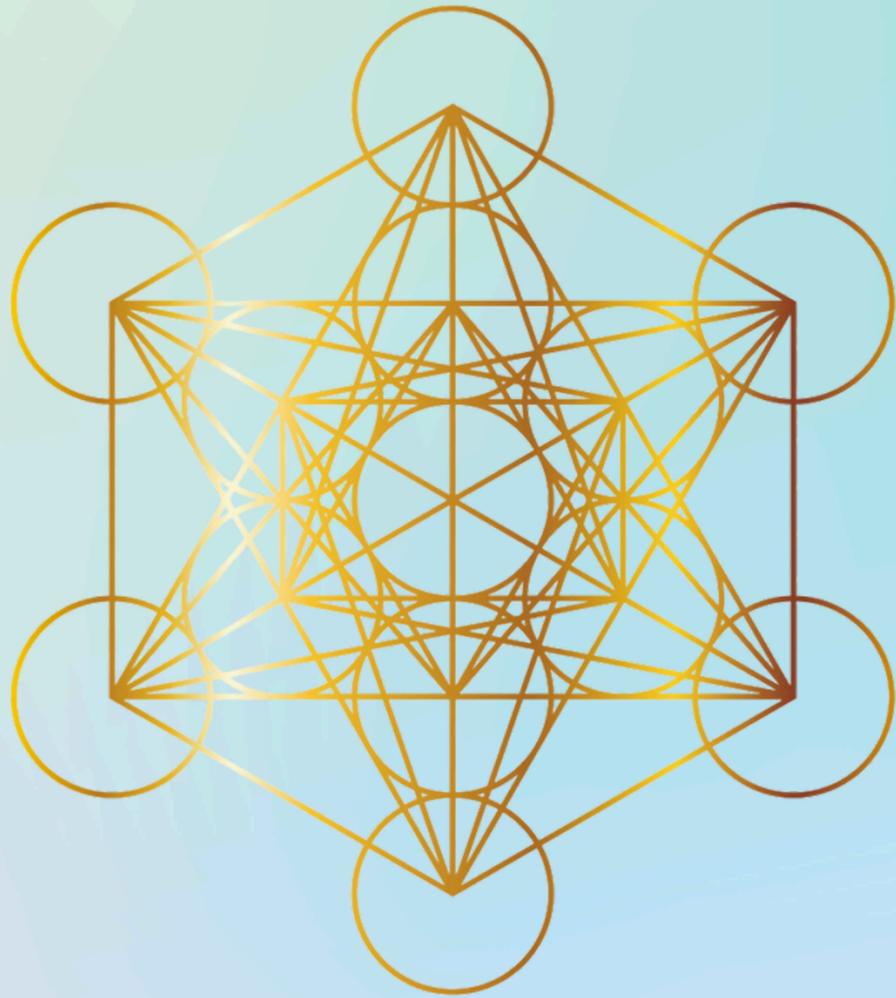

There is an equal amount of space between the faces of these solids. In a sphere, all sides of a solid touch the surface. Metatron's Cube comprises five solids formed by lines radiating from the circles.

Dodecahedron - There are 12 faces on a dodecahedron created by pentagons. This sacred shape represents ether, a component of the Universe.

Hexahedron - Six solid square faces make up the Hexahedron, as it represents earth, which is all about security, foundation, and stability.

Icosahedron - This sacred shape is composed of equilateral triangles with 20 sides. The element the Icosahedron represents is water, which is all about flow and adaptability, as well as changes.

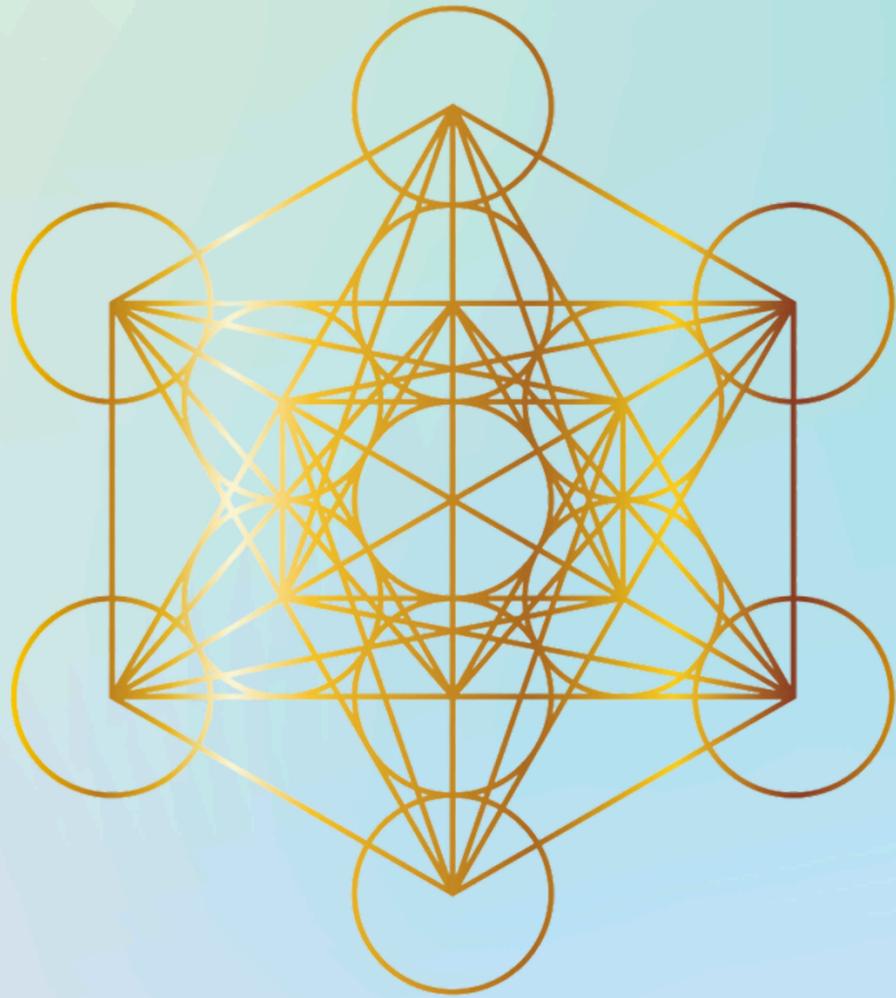

Tetrahedron - The Tetrahedron is composed of equilateral triangles with four sides, and it represents fire, which is passion, creativity, harmony, and balance.

Octahedron - This sacred shape is composed of equilateral triangles with four sides, and it represents the air element, which is all about movement, thoughts, and communication.

The **Dodecahedron** holds all of the elements together as it represents the ether of the Universe.

In 3-D as a merkaba
it looks like this.

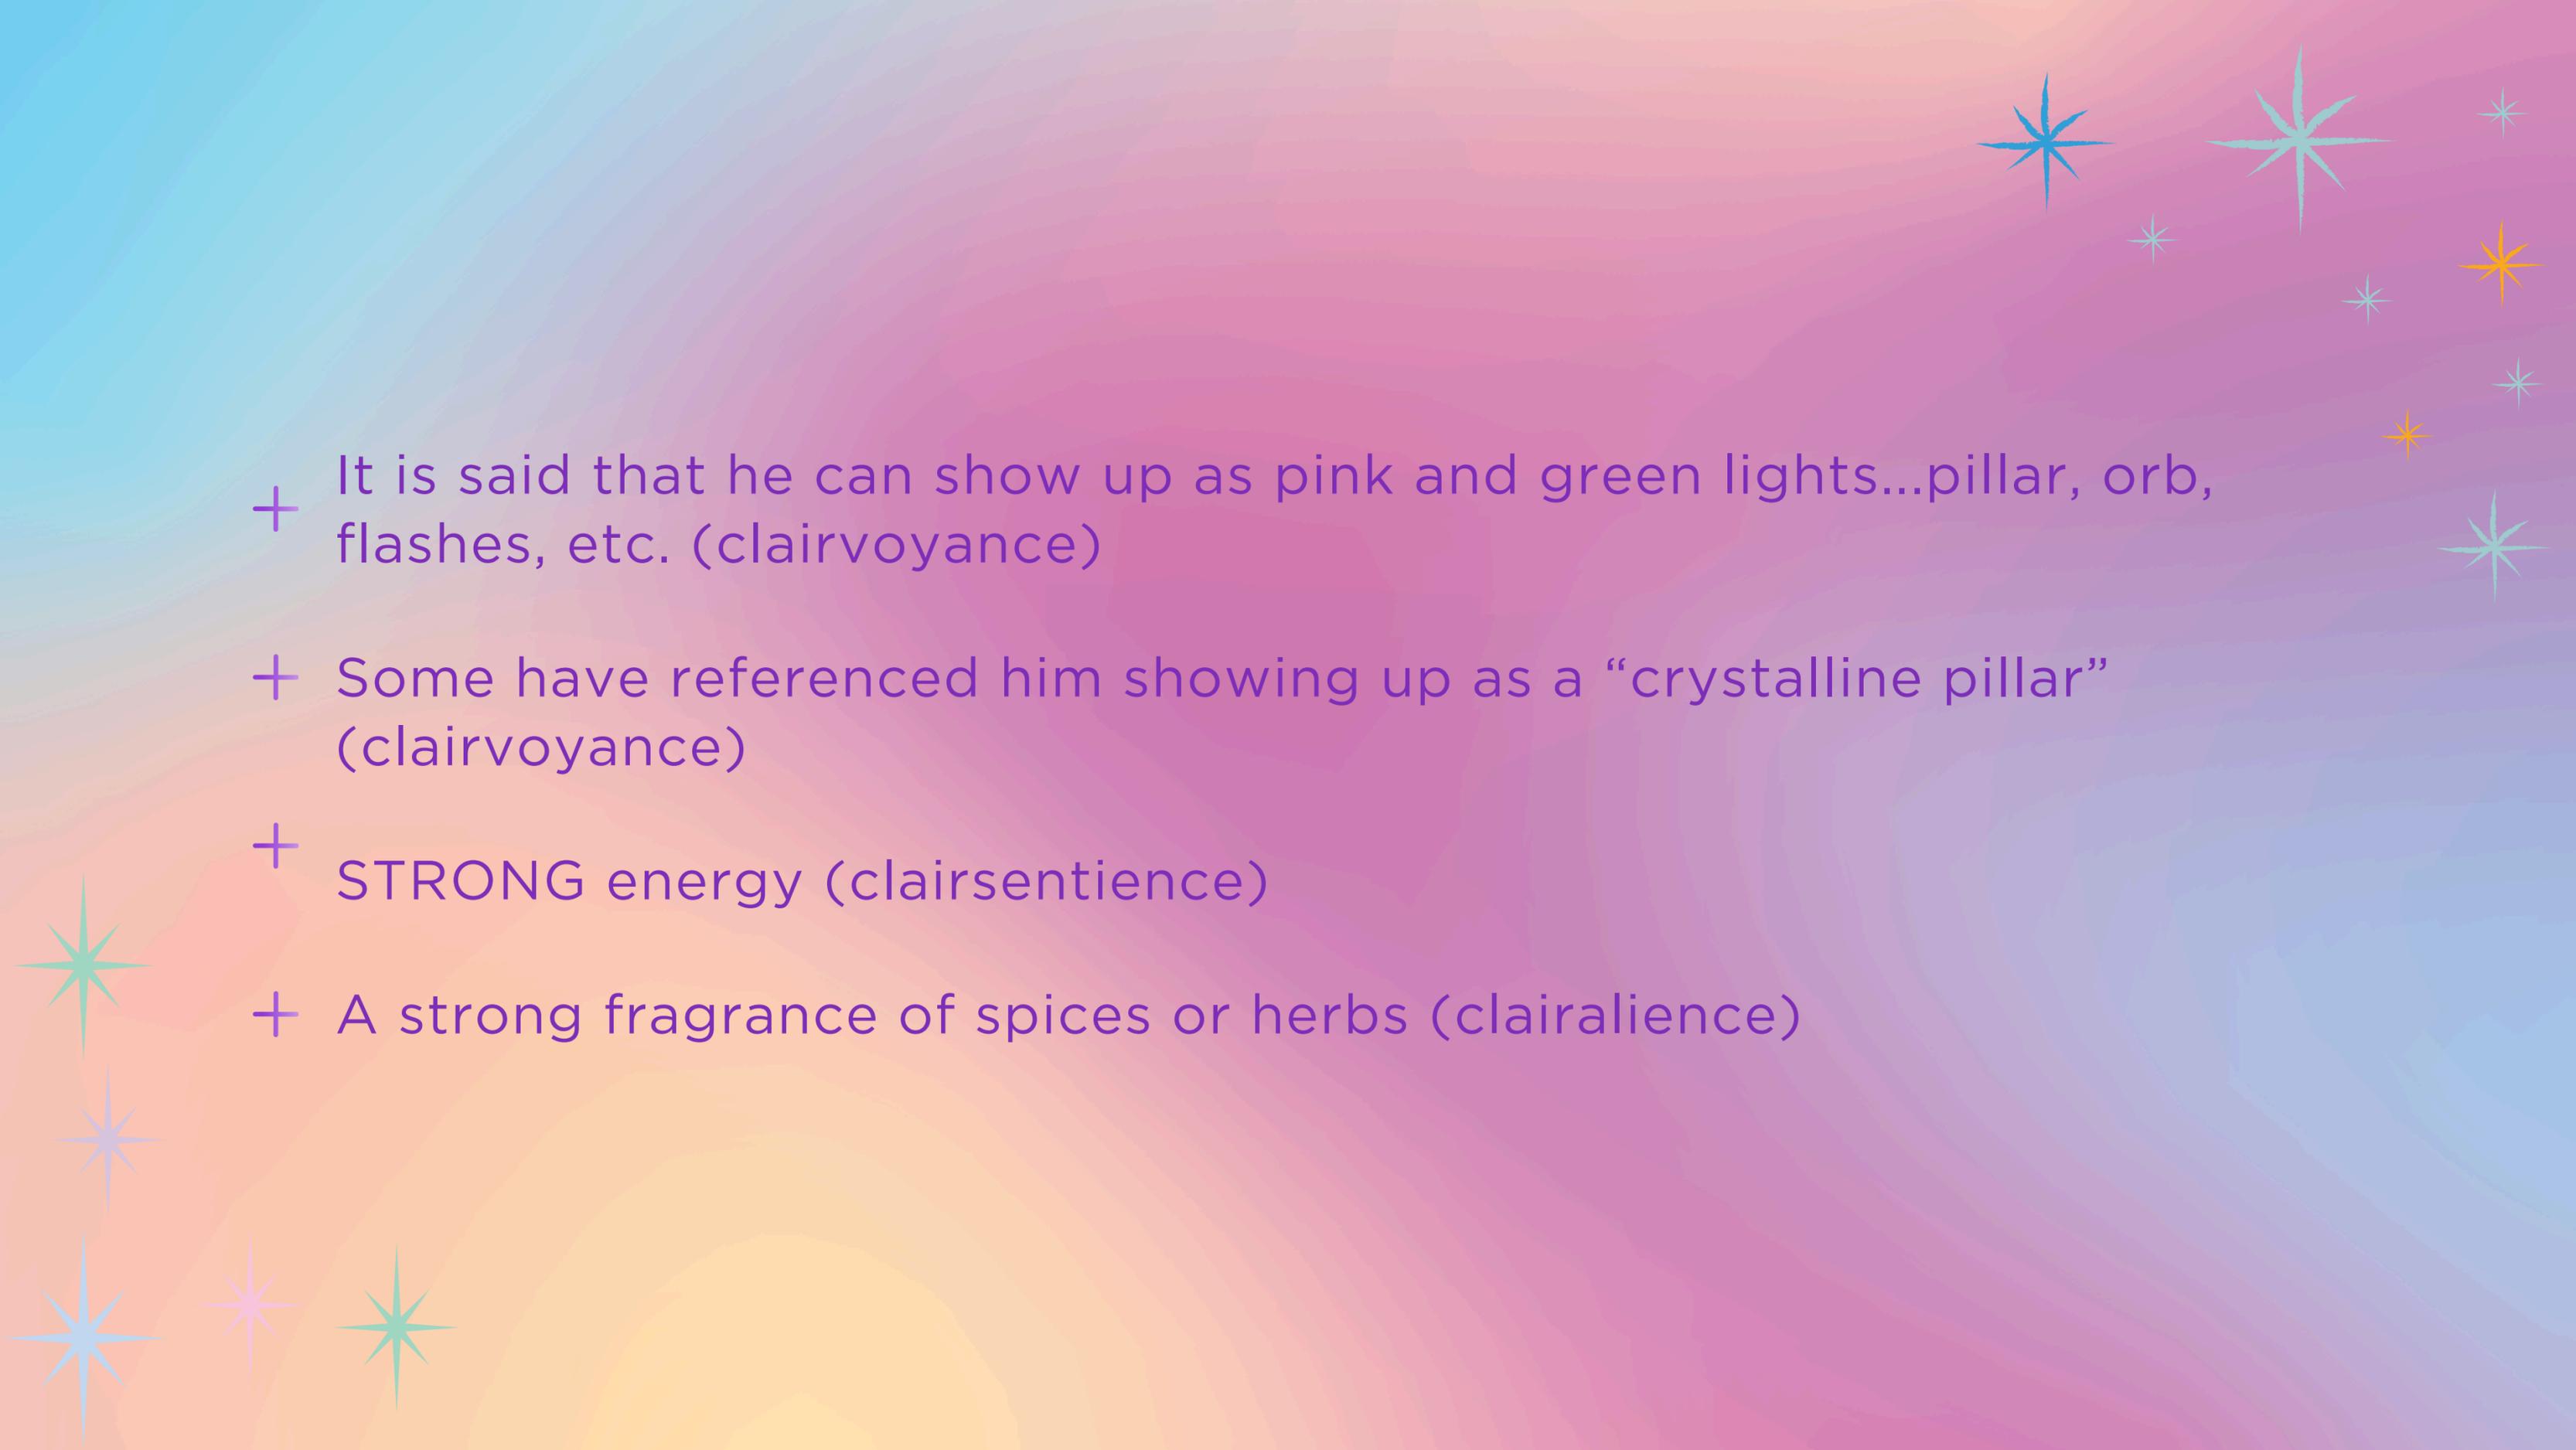

Metatron's Cube is helpful for:

- healing and energy work
- to meditate on when you want to make changes or shifts in your life
- to meditate on when you want to change your thinking from negative to positive or break certain thought patterns
- to help access higher consciousness, develop your gifts, unblock your chakras
- manifesting

How He Shows Up

- 
- + It is said that he can show up as pink and green lights...pillar, orb, flashes, etc. (clairvoyance)
 - + Some have referenced him showing up as a “crystalline pillar” (clairvoyance)
 - + **STRONG** energy (clairsentience)
 - + A strong fragrance of spices or herbs (clairalience)

Archangel Metatron is a strong, helpful, loving friend to call on when needed!

Don't be afraid to reach out and ask for help or guidance.

He is always there and happy to help.

Thank you!
